

The graphic novel database lists 50+ books by Australian authors and illustrators. The collection contains fiction and non-fiction titles encompassing a large range of genres. These books cover many topics from history to humour, children's stories in picture book format, biographies and more. Many of the books are illustrated in colour but a few are printed in black and white, which enhances these stories. The formats are of differing sizes and designs.

The database is an interesting start to a collection of literature that is gaining popularity with its ability to attract and motivate children to read through the use of visual stimuli, something we are constantly surrounded by today. We hope this will be a great place for parents and teachers to go to for suggestions on graphic novels to inspire and encourage children to pick up a different form of book. The database will be added to as we receive donations of more graphic novels.

Author	Title	Illustrator	Publisher and Date of Publication	Audience
Adams, Michael Edwin	<i>Terrortide</i>		Scholastic Aust. 2017	Primary
