

## **Anxiety and Worry – A select annotated bibliography**

Anxiety in children is common. It's that feeling that something bad is going to happen, that you will fail and disappoint others and yourself. It may manifest itself in physical reactions such as 'butterflies in the stomach.'

It is quite natural to feel afraid or worried in new situations such as starting school, or fear of the dark or certain animals. In younger children it may be anxiety about separation from a parent. As children grow the type of worries can change. School age children may worry about making friends, criticism, tests or sadly bullying or physical harm. Social media also plays a significant role in stress and anxiety amongst older children.

The books listed here are not intended to be a basis for diagnosis rather they provide a picture of situations that children (and adults) can relate to and help to create an understanding of their feelings.

***Expert help from a doctor, psychologist or counsellor should be sought for any ongoing concerns.***

The list is divided into picture books, primary age chapter books, young adult books and non-fiction.
