	Something to tell you story about Anna Flarberg and the str she caused when she 'yanked back the gumnul babies' with her 'rewriting of Snugglespot and Cutspoke', SMH, 20 Apr	1999	Newspaper	As a children's book creator and longtime juvenile literary champion, it's important to note that the author is not responsible for the twisting of classic books. A name is owed to retelling but it's almost 100% under the direction of the publisher's idea and ideal, directed by the senior editor. Anne would have had some initial leeway, then the books would have been edited, in group consultation, to offer the work to a modern audience. Thereby enhancing the likelihood that adults, librarians and teachers would buy and expose children to these books. Classic children's books are now oftentimes unreadable to young children, so offering them in this way means greater exposure to classic work. Having said this, I personally prefer the originals, and children should also have exposure to original classics. We can't underestimate their ability to comprehend these works of some stage in their lives, but we must remember that reading is changing dramatically. So, at least drawing it in and making them fun via phone classics will increase the likelihood that they will enjoy the original words as eventually... IMac
